

SureStart Flake

HIGH-QUALITY FLAKE FOR ENHANCED GROWTH AND POST-LARVAL QUALITY

Balanced formulation with premium marine proteins for post-larval growth and **shorter culture cycle**.

Enriched with functional health additives to **improve survival**.

Premium lipids for **optimal hepatopancreas functioning**.

Highly attractive to **minimize cannibalism**.

Natural pigments for **the coloration of hepatopancreas and gut**.

SureStart Black Flake

SureStart Red Flake

SureStart Flake

FEEDING GUIDE

	SureStart Black / Red Flake		
	PL1 - PL4	PL5 - PL9	PL10 - PL14
sieve size	200 µm	300 µm	450 µm
Daily amount/ 100,000 (post) larvae	12-25 g	27-63 g	75-150 g

For Z3-M3: use 100 µm sieve.
From PL15 onwards: use a 600 µm sieve.
Adjust according to local conditions.

INSTRUCTIONS FOR USE

1. If required, crumble the flake and rub through a filter screen to obtain the desired particle size.
2. Apply the flake fragments directly to the culture tank.

COMPOSITION

TYPICAL ANALYSIS

Nutrient	SureStart Black / Red Flake
Protein	51%
Lipid	11%
Fiber	1%
Moisture	4%
Ash	10%

PACKAGING

6 kg / Bucket
12 kg / Carton box

STORAGE

Store cool (< 25°C) and dry.
Once opened, keep refrigerated and use within 1 month.

INGREDIENTS

Marine proteins, plant proteins, minerals, plant starches, yeasts, marine oils, lecithin, vitamins, preservatives and antioxidants

SHELF LIFE

24 months

CAUTION

Developed for aquaculture.
Not for human consumption.
